GMG's Green Cleaning program is good for the community and the environment at large. Additionally, for you and your company the benefits include: a more comfortable work space, increases in productivity, decreases in illness and absenteeism and overall cost savings.

Green cleaning allows you to provide a healthier work place. It will decrease indoor office pollutants and improves air quality for your employees and visitors and for our custodians.

GMG uses green cleaning products and cleaning methods which are good for the environment.

Green Cleaning in Action

At **GMG** we have a commitment to green clean and naturally implement the following US Green Building Counsel (USGBC) recommendations into all of our janitorial services:

- Utilizing cleaning processes which physically remove dirt – not just move it around.
- Training for employees on how to use chemicals properly – maximize cleaning efforts while minimizing waste.
- Educating our staff on Green Cleaning advancements.
- Regular cleaning and maintenance checks for our equipment, so that they always work at peak capacity.

Green Cleaning Services

GMG utilizes Green Cleaning at all times. These services include:

- Our use of environmentally friendly Green Seal certified cleaning products.
- HEPA filter vacuums for those clients who request this.*
- Using paper and liner products produced with post-recycled materials.
- Utilizing microfiber mops and rags which require less washing thereby saving on water and detergent.
- Providing recycling program for everything from glass and cans, to paper, to printer and copy machine toner cartridges, to keeping old office machines, computers, monitors and cell phones out of landfills.
- Exterior building maintenance.

GMG's Recycling Program

We are very proud of our recycling program. The program is flexible. You choose what type(s) of materials you want to recycle. We will tailor our program to fit your needs, then train you and your staff on how to maintain it on a daily basis.

Learn how recycling can benefit your company. Contact us today and get your free estimate.
